BOIL WATER ADVISORY IN EFFECT

Due to a depressurization of the waterlines in the service area from the waterline break, the conditions outlined by the Interior Health Authority have been met to issue a Boil Water Advisory. This advisory is issued in an abundance of caution as a depressurization of a waterline can allow contaminants to enter the water supply.

What you should do:

Bring water to a rolling boil for at least 1 minute that is used for:

- Drinking
- Brushing teeth
- Washing fruits and vegetables
- Making ice
- Preparing infant formula.

Duration:

The BWA will be in effect until multiple water tests are completed, and the water can be confirmed as safe. These tests must be taken in 24-hour intervals. We will notify you once IHA allows the advisory to be lifted. We apologise for the inconvenience and appreciate your cooperation.

Kind regards,
