## **PRECAUTIONARY BOIL WATER ADVISORY**

Due to low water pressure in the Fairmont Utility Service Area, Fairmont Hot Springs Utilities is issuing a Boil Water Advisory **effective immediately**.

### **What Happened:**

Due to a water main break and subsequent drop in water pressure, the drop in pressure can increase the risk of contamination entering the water system. As a precaution we advise all customers to boil their water until further notice.

### **What you should do:**

- **Boil all water** used for drinking, cooking, making ice and brushing teeth
- Bring water to a rolling boil for at least one minute and then cool before using

**Duration:** The advisory will be in effect until multiple water tests are taken, tested, and the water can be confirmed safe. These tests must be taken in 24-hour intervals. We will notify you once the advisory can be lifted.

We apologize for the inconvenience and appreciate your cooperation.
